Search for Articles in ProQuest
From the library homepage, click on the “A to Z Database List” link.
On the Search page, use the Quick Search ProQuest box and place your keyword(s) in the search bar.
If you are off campus, you will need to login using you Aurora University username and password. This is the same username and password you use to login to your student email, Moodle, and Webadvisor.
After reaching the ProQuest database, you will then see a results page with sources that the database has retrieved.
