Search for Dissertations and Theses in ProQuest
From the library homepage, click on “A to Z Database List.”
On the Search page, use the Quick Search ProQuest box and place your keyword(s) in the search bar.
If you are off campus, you will need to login using your Aurora University username and password. This is the same username and password you use to login to your student email, Moodle, and Webadvisor.
On the results page scroll down and click on “Dissertations & Theses” on the left side of the page under Source Type.
Your results should now be narrowed down to only dissertations and theses.

A scroll icon will appear next to all of these types of documents.
